Ria Choi

Entry Level Full Stack Developer

WORK EXPERIENCE

WEE'S GROUP, Busan, South Korea

Technical Product Manager   2020/07-2021/03

- Planned and structured websites using graphic and prototyping tools to ensure customer requirements were accurately reflected before development.
- Acted as a communication bridge between clients and engineers, translating business needs into clear technical and design requirements.
- Coordinated and executed website renewals, updating layouts and visual elements to align with current design trends.

PROJECTS

E-Commerce Website   2025/10

- Built an e-commerce application using React and Redux with centralized state management.
- Implemented a shopping cart system using Redux reducers and store to ensure predictable state flow.
- Integrated backend API requests during checkout to handle cart and transaction logic.

Sign Up Page   2025/09

- Implemented user authentication features, including sign-up and sign-in, with credentials stored in a SQL-based database.
- Integrated frontend with backend services to handle authentication workflows and secure user data management.
- Applied server-side validation to ensure data integrity and secure access control.

Reservation & Form Submition Page   2025/11

- Built Travel Today, a full-stack booking and search web application using HTML, CSS, and Vanilla JavaScript, focusing on core JavaScript fundamentals without frontend frameworks.
- Implemented client-side and server-side form submission handling with validation and persistent data storage.
- Developed a Node.js and Express backend API to handle form submissions and server-side logic.

Movie Search Page   2025/12

- Built a movie discovery web application with search and trending features using data from the TMDB API.
- Implemented real-time API data fetching and dynamic rendering of search results based on user input.

Logo Detection App   2026/01

- Built Yogo, a mobile application using React Native (Expo) for automated logo recognition.
- Integrated Google Vision API (Logo Detection) to analyze uploaded images and remote image URLs.
- Implemented image preprocessing and request formatting to meet API requirements.

SKILLS

Hard Skills:

- Full Stack Web Developing
- Troubleshooting
- Debugging
- Cloud Computing

Techniques:

- Agile Development Methologies
- Psuedo Driven Development
- Version Control
- Code Optimization
- Advanced in SQL, Javascript, HTML/CSS, React, React Native, Express and Node

Tools:

- Webstorm
- Npm
- Terminal
- Kanban
- Docker

EDUCATION

Oregon State University
B.S in Computer Science
Corvallis,OR - 12/2028

CERTIFICATION

- Asure Fundamental
- Responsive Web Design Certificate
- JavaScript Certification
- Front End Development Libraries Certification
- React Certificate
- IBM Full-Stack JavaScript Developer
- AWS Cloud Practitioner Certification
