Ria Choi

Full-Stack Web Developer · Java / Spring Boot · JavaScript·TypeScript / Next.js · PHP·Laravel

riiachoii@gmail.com | github.com/riiach | LinkedIn | Tech Blog | riachoi.com | South Korea

A collaborative developer who values clear communication and is easy to work with.

TECHNICAL SKILLS

Language JavaScript (Fluent), TypeScript; Java & PHP: learning since early 2026; mastery goal: 2027
Framework / Library Spring Boot, Spring Data JPA(Hibernate), Spring Security(JWT), Spring Cloud Gateway, QueryDSL, Laravel, React, Next.js, Vue.js
Frontend React, Next.js, React Native, Redux, TanStack Query, SWR, Axios, Tailwind CSS
Data / Infra PostgreSQL, MySQL, Redis, H2, Docker/Docker Compose, Terraform, GitHub Actions
Messaging / MSA Kafka, RabbitMQ, Netflix Eureka, OpenFeign, Resilience4j, Zipkin, Prometheus/Grafana/Loki
Tools IntelliJ IDEA, WebStorm, TablePlus, Laragon, Prisma Studio, Git/GitHub, Postman, Notion
AI Claude Code, GitHub Copilot, Cursor, ChatGPT, JetBrains AI Assistant (IntelliJ)
Deployment / Cloud Services AWS, Google Cloud, Azure, Vercel, Render, Hostinger
External APIs Google Gemini API, Google Calendar API, Slack API, Kakao Local/Mobility API

EXPERIENCE

Technical Project Manager — WEE'S GROUP | *2020*

- Managed client relations and communication with major brands including JW Marriott, Busan Air, and Lancôme
- Planned brand websites for clients — designed site structure and content direction

PROJECTS (SPARTA JAVA·SPRING BOOT BACKEND BOOTCAMP · TEAM PROJECTS)

TodayEats — Integrated Food Delivery, Payment & Review Platform | *Apr 2025 · Team of 5 · GitHub: GolemOnce/Sparta-TodayEats | About this project | GitHub | Documentation*

Tech Stack Spring Boot, PostgreSQL, Redis, QueryDSL, JWT/Refresh Token, Gemini API, Docker Compose

- Designed and implemented the Menu domain — separated JPQL queries by viewer role (owner/customer) and split 'hidden' and 'sold out' into distinct status fields
- Integrated Gemini AI API to auto-generate product descriptions; implemented exception handling by failure type (timeout / API error / empty response) and a request logging system

LogiBox — MSA-Based B2B Logistics & Delivery Management System | *May 2025 · Team of 4 · GitHub: GT5-LT7/LogiBox | About this project | GitHub | Documentation*

Tech Stack Java 17, Spring Boot 3.5, Eureka, Spring Cloud Gateway, RabbitMQ, Redis, PostgreSQL, Zipkin, Docker

- Implemented Redis distributed locking (SETNX + Lua Script) for inventory concurrency control, resolving overselling under concurrent orders
- Built a Saga pattern over RabbitMQ for asynchronous order-delivery state management, including compensating transactions (stock rollback) on delivery failure
- Designed a Gemini AI-based delivery risk analysis feature (prompt generation / API call / response parsing separated by single-responsibility principle), with automatic Slack alerts for HIGH-risk deliveries

KOK — Real-Time Restaurant Reservation & Waitlist Platform **[Dev Lead]** | *Jun – Jul 2025 · GitHub: 5makase/KOK | About this project | GitHub | Documentation*

Tech Stack Java 17, Spring Boot, Spring Cloud Gateway(WebFlux), Eureka, OpenFeign, Resilience4j, Kafka(Outbox), PostgreSQL, Redis, Prometheus/Grafana/Loki/Zipkin, Docker/Terraform, AWS, k6/JMeter

- Served as Dev Lead on the team's final project — owned service architecture design and coordinated API interfaces and schedules across team members
- Implemented JWT authentication filter and routing MVP on Spring Cloud Gateway; led resolution of CORS/auth issues during frontend integration
- Built member lookup API and owner (OWNER) approval workflow; designed internal-only APIs consumable by other microservices
- Wrote k6 load tests to quantitatively measure JWT validation/routing overhead for the login API and API Gateway
- Provisioned and deployed the service infrastructure to AWS (Terraform-managed) for real-world load testing; decommissioned the deployment after testing to manage cloud costs — infrastructure/deploy configs

PERSONAL PROJECTS

riachoi_services — Full-Stack Portfolio & Blog Platform | *GitHub: riiach/riachoi_services | Website Link | GitHub*

Tech Stack Next.js, Prisma, PostgreSQL, Docker, Resend

- Designed and built a blog platform with Next.js and Prisma/PostgreSQL, deployed and operated on Vercel
- Implemented production-level features including email delivery via Resend

AIM — Church Website & Management System | *GitHub: riiach/AIM-Church-Busan, church-website, church-login-website, AIM-Church-Busan/aim_backend | Website Link (Frontend, in progress) | GitHub*

Tech Stack PHP(Laravel, Filament), Next.js, MySQL, Axios, TanStack Query, SWR, Vercel

- Built a website with a Laravel backend, Next.js frontend, and MySQL, including a back-office dashboard for content and data management
- Built the admin back office on Filament (Laravel), using its resource and form builder to manage church content and member data without hand-rolling CRUD screens
- Continuously added features to meet real operational needs (Church Bulletin API, subscriber management) and deployed a separate login service on Vercel

Portfolio Projects (Udemy Course) — Laravel + Blade, Vue.js, React.js | *GitHub: riiach/lara-vue-portfolio* | *About this project* | *GitHub*

Tech Stack Laravel, Blade, Vue.js, React.js

- Completed a Udemy course building three portfolio-style projects, practicing server-rendered Laravel/Blade templating alongside component-based frontend development with Vue.js and React.js

FRONTEND PROJECTS

E-Commerce Website (GreatFrontend Project) | *React, Redux, Express/Node, Tailwind, Stripe API, Render | 2025* | *About this project*

Tech Stack React, Redux, Express/Node, Tailwind CSS, Stripe API, Render

- Built a full-stack e-commerce site with a cart and checkout flow, integrating the Stripe API for payments
- Managed cart state with Redux reducers and a centralized store for consistent behavior across the site; deployed on Render.com

Sign Up / Sign In Page | *React, Tailwind, Express/Node, MySQL | 2025* | *About this project*

Tech Stack React, Tailwind CSS, Express/Node, MySQL

- Implemented user sign-up and sign-in with a MySQL database for credential storage
- Built the backend integration, authentication workflow, and server-side validation with Express/Node

Movie Search Page | *React, Tailwind, Express/Node, TMDB API | 2025* | *About this project*

Tech Stack React, Tailwind CSS, Express/Node, TMDB API

- Built a movie search and trending-titles page that fetches real-time data from the TMDB API and renders results dynamically
- Designed a responsive, consistent UI with Tailwind CSS

Travel Today — Travel Recommendation App | *HTML/CSS, Vanilla JavaScript, Express/Node, MySQL | 2025* | *About this project*

Tech Stack HTML/CSS, Vanilla JavaScript, Express/Node, MySQL, Form Submission, CSS Calendar Rendering

- Built a full-stack travel search and booking app with no frontend framework, implementing the UI logic in vanilla JavaScript
- Created a Node.js/Express API that saves form submissions to a MySQL database hosted on Hostinger
- Implemented booking form submission end to end, and built a custom calendar UI in vanilla JavaScript that renders the month grid and uses CSS ::before/::after pseudo-elements to circle selected dates

Yogo — Logo Detection App | *React Native (Expo), Express/Node, Google Vision API | 2026* | *About this project*

Tech Stack React Native (Expo), Express/Node, Google Vision API

- Built a mobile app with React Native (Expo) that recognizes logos using the Google Vision API
- Handled both image uploads and remote image URLs, converting them into API requests and parsing detection results in real time

riachoi.com — Personal Website | *React, GSAP* | *Website Link* | *GitHub*

Tech Stack React, GSAP

- One of my earliest React projects, built primarily as a showcase for GSAP-driven animation and motion design rather than backend or data architecture
- Folder structure and data handling reflect an earlier stage of my React skills; later projects show clearer separation of concerns and more deliberate state and data management

Cinematic Flip Card | *React, Framer Motion* | *Website Link* | *GitHub*

Tech Stack React, Framer Motion

- Built a cinematic flip card banner using Framer Motion for 3D flip transitions and staged animation sequencing

CERTIFICATION

- **Bootcamp Completion Certificate — [Java] JPA-Focused Practical Spring Backend Engineer Program, Sparta Club (Apr 6 – Jul 15, 2026)**
  Curriculum: Spring Fundamentals/Advanced/Proficiency, Advanced JPA, Docker + CI/CD, MSA (Microservice Architecture), In-Memory Storage & Caching Strategy, Large-Scale Stream Processing, Monitoring & Secure Coding, Incident Response, Advanced Project Management, AI Literacy
- **Certificate of Completion — 3 Portfolio Projects with Laravel + Blade, Vue JS, React JS, Udemy (Sep 2026)**
- Application Development using Microservices and Serverless — IBM (Jan 2026)
- Introduction to Containers w/ Docker, Kubernetes & OpenShift — IBM (Dec 2025)
- Microsoft Certified: Azure Fundamentals — Microsoft (Nov 2025)
- Developing Front-End Apps with React — IBM (Nov 2025)
- Cloud Fundamentals — LearnKartS (Oct 2025)
- JavaScript — freeCodeCamp
- JavaScript Programming Essentials — IBM (Jan 2026)
- Get Started with Cloud Native, DevOps, Agile, and NoSQL — IBM (Dec 2025)
- Developing Back-End Apps with Node.js and Express — IBM (Nov 2025)
- React — w3schools.com (Nov 2025)
- Legacy Responsive Web Design V8 — freeCodeCamp

VOLUNTEERING

Website Manager — Antioch International Ministry — 2025 – 2026

EDUCATION

Oregon State University — Computer Science (In Progress) · Portland, Oregon, USA
